

Professional Measurement Surveyors

**Formby
Surveys**

Architecture & Design

Sector Summary

The Architecture and Design sector is all about accuracy and detail. Our involvement with this sector covers the planning, design and construction stages of a design process by providing accurate 3D models and 2D plans, sections and elevations of existing properties, sites or buildings.

The Architecture and Design based sector continues to be the backbone of our client base and together with technological advancements allows us to provide a growing range of services in areas such as 3D Revit & BIM modelling, 360° Photography & Panotours and high definition Laser Scanning.

Services

- Measured Building Surveys
- 3D Revit & BIM Modelling
- 360° Photography & Panotours
- 3D Laser Scanning
- Topographical & GPS Surveys
- Utility Mapping & CCTV Surveys

Civils & Infrastructure

Sector Summary

Civil Engineering & Infrastructure projects can present unusual, unique and complex challenges. Our range of services for both of these sectors are designed to provide bespoke and innovative solutions to this important sector, covering road infrastructure, waterways, utility infrastructure, through to mining and sub-surface assets.

We continually rise to new challenges, applying our experience, and expertise in innovative ways, such as sub-surface laser scanning and UAV surveys, to meet the challenges that present themselves in complex Civil Engineering & Infrastructure projects on a daily basis.

Services

- Sub-Surface Laser Scanning
- UAV Surveys
- 3D Laser Scanning
- 3D Revit & BIM Modelling
- Mobile Mapping
- Monitoring
- Terrain Modelling & Volumetrics
- Topographical & GPS Surveys
- Utility Mapping & CCTV Surveys

Energy & Utilities

Sector Summary

Identifying existing utilities can help to avoid any complications in the fundamental stages of any development project. Our surveys for the Energy & Utilities sectors are carried out to rigorous specifications, using our specialist equipment to undertake surveys on any given project ranging from small complicated gas stations to sub-

surface voids, and from identifying water mains and electricity cables buried underground. Our team use the latest equipment and techniques to provide our clients with quality, detailed information that enables them to take their projects to the next stage.

Services

- Topographical & GPS Surveys
- Utility Mapping & CCTV Surveys
- UAV & Aerial Surveys
- 3D Laser Scanning
- 3D Revit & BIM Modelling
- Mobile Mapping
- Sub-Surface Laser Scanning

Health & Education

Sector Summary

We are committed to delivering quality, efficient solutions for our clients. The management and operations of a project within the Health or Education sectors are long term investments. We pride ourselves on operating an efficient process, managing data effectively and delivering a consistent professional service. The Health

and Education sectors often require us to undertake Measured Building Surveys, Topographical Surveys, 3D Laser Scanning and 3D Modelling projects. We have the capabilities to manage all scales and sizes of projects in both of these sectors, including schools, GP's surgeries and hospitals.

Services

- Topographical & GPS Surveys
- Utility Mapping & CCTV Surveys
- UAV & Aerial Surveys
- 3D Laser Scanning
- 3D Revit & BIM Modelling
- Mobile Mapping
- Sub-Surface Laser Scanning

Leisure & Tourism

Sector Summary

The Leisure & Tourism sectors are sectors of growth for Formby Surveys and we play an active role in all of these emerging areas. Our Leisure & Tourism projects range from completing a boundary survey of a sports field, to undertaking a high specification verticality survey project for theatres, or completing 3D digital mapping for a new

cycle way. Due to the continually changing nature of the Leisure & Tourism sectors, we are presented with new opportunities on a regular basis working with Sport & Physical Recreation, Arts & Entertainment, Countryside Recreation and home based leisure.

Services

- Topographical & GPS Surveys
- Measured Building Surveys
- 3D Laser Scanning
- 360° Photography & Panotours
- 3D Revit & BIM Modelling
- Utility Mapping & CCTV Surveys

Office & Industrial

Sector Summary

Formby Surveys provides measurement solutions to the Office and Industrial sectors. Our services range from providing area analysis and referencing for office portfolios, to creating complex plans, detailing elevations and the section data of industrial buildings. Our clients needs can be varied in respect of property and we are well aware of

this. Through specially written data collective software, the solutions on offer for these markets are driven by advanced measurement technology, underpinned by an approach centered round relevant and cost effective delivery, through effective client management.

Services

- Area Analysis
- Measured Building Surveys
- 360° Photography & Panotours
- 3D Laser Scanning
- 3D Revit & BIM Modelling

Planning & Legal

Sector Summary

Services

The legal profession is a growing market for Formby Surveys. We already provide a number of legal firms with measurement solutions including land registry compliant plans, Ordnance Survey mapping, boundary determination, Daylighting and Rights of Light (ROL) Calculation. Through extensive experience and knowledge of maps, plans and

digital data, we are able to assist the legal profession with a variety of solutions such as the determination of individual land parcel boundaries, boundary demarcation, assessment of land areas for sales, and presentations and supplying Ordnance Survey mapping data.

- Daylighting & ROL Modelling
- Land Registry
- Area Analysis
- Topographical & GPS Surveys
- Utility Mapping & CCTV Surveys

Property Development

Sector Summary

Formby Surveys offer Property Development services, providing our clients with information that will assist in all aspects of planning and development in both the public and private sectors. Our surveys play a substantial role in the creation of sustainable developments as our clients from each sector are often planning consultants, developers,

local authorities and governing bodies who require information relating to land registry, rights to light and utility mapping. Other services that are often utilised when working on projects within the Property Development & Investment sector include our 360° Photography & Panotours services and our 3D Revit & BIM Modelling Services.

Services

- Measured Building Surveys
- Topographical & GPS Surveys
- 360° Photography & Panotours
- 3D Revit & BIM Modelling
- Area Analysis
- Land Registry

Public Sector

Sector Summary

Formby Surveys has been undertaking surveys of public buildings and infrastructure for over 20 years. We cover conventional topographical surveys and utility surveys for local authorities, education authorities and hospitals. Over the last decade, the public sector has invested heavily in education and health estates.

This has led progressively from conventional 2D property data such as floor plans and elevations to database driven asset management plans from which both spatial and non-spatial data can be maintained and analysed through facilities management systems.

Services

- Topographical & GPS Surveys
- Utility Mapping & CCTV Surveys
- 3D Laser Scanning
- Mobile Mapping

Retail

Sector Summary

Formby Surveys has years of experience in providing measurement solutions to the Retail Sector. From Area Analysis and referencing of portfolios, to complex plans, elevations and creating section data of supermarkets, our extensive range of surveyor services are incredibly applicable to the Retail Sector. Through specially

written data collection software, the solutions on offer for the market are driven by advanced measurement technology, underpinned by an approach centered round relevant and cost effective delivery through effective client management.

Services

- Area Analysis
- 360° Photography & Panotours
- 3D Revit & BIM Modelling
- Measured Building Surveys
- Topographical & GPS Surveys
